

### DESCRIPTION:

Elysia is our innovative nursing pillow designed to offer mother and child maximum ergonomic comfort during breastfeeding.

### ELYSIA'S BENEFITS

#### For mother/parent:

- It supports the baby at just the right height, thus promoting a relaxed posture for the parent, relieving tension on the back and shoulders in various positions: cradle, cross-cradle, and rugby hold.
- The widened ergonomic shape on the sides supports the elbows, reducing limb fatigue and preventing muscle pain.
- The practical adjustable lower back strap keeps the pillow in position at all times, adapting to the parent's physique. What's more, the ultra-fast magnetic clasp allows you to easily fasten the strap using just one hand.
- The 3 practical handles allow you to position it correctly and carry it anywhere with ease.
- The surface of the cushion that comes into contact with the mother's abdomen is covered in highly breathable and sweat-wicking 3D mesh to offer maximum comfort at all times.
- The cover can easily be removed thanks to a wide zip, making it easy to sanitise/wash the product.
- Inglesina's Elysia pillow has obtained the IGR ergonomic certification, which attests that the product has excellent ergonomic characteristics according to the DIN EN ISO 26800 and EN ISO 15537 standards.

#### For baby:

- It grows with your baby, thanks to the different-density padding on each side, promoting their ideal posture and correct latching onto the breast.
- **"First Milk" side ideal for newborns (0-3m):** the firmer surface supports the head, neck, and torso, promoting latching onto the breast when muscles are still weak.
- **"Second Milk" side ideal for when they grow (3+ months):** the softer surface is designed to offer the right support as the baby grows, gains more weight, and develops greater muscle strength.
- The "Comfort Zone," the central insert on the "newborn" side, features a differentiated density that allows the baby's lumbar area to gently sink in, promoting proper torso-head alignment.
- The bamboo fabric paired with 3D mesh ensure the baby's temperature is optimally regulated, keeping them cool and dry even during long feeds.
- The inner lining of the pillow is made of stain-resistant treated fabric to prevent milk or other liquids from penetrating the padding, ensuring maximum hygiene and, at the same time, maximum breathability.

### USE: 0-3+ MONTHS

→ 0-3 months\_First Milk side

→ 3 + months\_Second Milk side

### Optional accessories:

- *Elysia Cover* is the soft bamboo accessory, ideal when the main pillow cover is being washed.

### TECHNICAL INFORMATION:

<b>External lining material:</b>	bamboo fibre/cotton and 3D mesh
<b>Internal lining material:</b>	WR treated PES fabric
<b>Padding material:</b>	compact PES wadding, double density
<b>Dimensions:</b>	60.5 x 41 x 13.5 cm
<b>Weight:</b>	900 gr

**CODES:**

AZ98S0QUB	Quiet Beige
AZ98S0DLP	Delicate Pink
AZ98S0BLG	Balance Green
AZ98S0HMG	Harmony Grey
AZ98S0WMB	Warm Beige
