

### DESCRIPTION:

The Welcome Pod helps babies to relax and fall asleep more easily because it envelops them in a cosy space that makes them feel protected.

### WELCOME POD ADVANTAGES:

- It promotes a peaceful and comfortable sleep and fast falling asleep at any time. It can be easily placed in the baby bed, facilitating room sharing with parents.
- The compact, anti-crushing edge padding ensures proper physical restraint.
- It adapts to newborns' growth, thanks to the opening bottom and the adjustable anatomical cylinder, that gently accompanies the natural flexion of the baby's legs, promoting osteoskeletal muscle relaxation.
- It is handy to carry on the road with the practical bag, thanks to its light weight and small size.
- Removable and hand-washable lining.
- Because of its shape:
  - promotes comfortable lying on the back and alignment of the spine; it helps the babies to breathe correctly.
  - The special shape of the ergonomic disc where the babies rest their heads can mitigate the risk of plagiocephaly, better known as Flathead Syndrome, and promotes heat dissipation from neck. It also favours the natural closure of the posterior fontanelle.
  - The special arch quilting on the underside provides the baby with tactile experiences that are essential for gaining knowledge of themselves and their body structure.
  - It controls the baby's temperature and perspiration thanks to its highly breathable, anti-sweat and hypoallergenic cotton and bamboo fibre lining and 3D mesh inserts.

### USE: 0-8 MONTHS

→ up to 9 weeks of age, or until the baby starts to move, it can be used as a crib and baby bed adapter;

→ birth to 8 months of age, the product can be used for playtime, cuddling and exercises preparatory to their mental and motor growth, such as Tummy Time.

### TECHNICAL INFORMATION:

|   |                         |
